

PRODUCT GROUP: STATIONARY PRESSURE CLEANERS

MANUFACTURER: KARCHER

PRODUCT: HDC 20/16 CLASSIC

Compact multi-user pressure cleaner for stationary installations. Designed for 1 or 2 simultaneous users at maximum pressure and maximum flow.

Two versions are available: Low-temp for inlet water up to 60°C or high-temp for accepting inlet water up to 85°C.

Standard features include a high performance crankshaft driven pump, variable pressure and flow, full chassis for direct wall mounting, stainless steel outer housing, four pole (low speed) water/air cooled motor, dry run protection, break tank isolation from water mains, low pressure shut down, flow leakage detection. A floor stand is optional.

The high-temp model features the Karcher patented booster pump, which injects the hot inlet water into the pump, thereby eliminating cavitation and hammering. This greatly increases the life of pump components, hydraulic installations and associated equipment.

Suitable for unique high or low pressure chemical dosing/foaming applications at individual points (optional accessories required).

Technical Data Karcher HD 20/16 Classic

Power Supply	3 Phase 400 V 20 A
Motor Power [Kw]	11
Operating Pressure [BAR PSI] [Variable Static]	> 160 2320 [Variable]
Water Flow [Litres/Minute] [Variable Static]	> 33 [Variable]
Maximum Temperature Feed [° C]	60 85
Weight [kg]	150
Dimensions [L x W x H (mm)]	860 x 635 x 580
Standard Accessories [Included]	N/A
