The BAR 2765 BrE is a no-frills, petrol powered high pressure cleaner that is well-balanced, compact, portable and very easy to use. The machine is manufactured by Hydro Tek in the USA and is marketed as an entry level commercial hot water pressure cleaner.

The machine features an electric start Vanguard 6.5 HP petrol motor by Briggs & Stratton. The motor is coupled directly to an Annovi Reverberi Triplex high pressure pump. The AR pump features a brass cylinder head and ceramic plungers.

The Beckett 12 Volt DC burner is mounted on an angle to both reduce the footprint of the machine and to maintain stability - while still being protected from knocks and bumps by the powder coated SHS steel frame. Power to the burner is provided by a 12 Volt battery, which also provides electric start for the motor.

The steel frame provides a lifting point for loading and unloading and also allows for neat and easy storage for the high pressure lance and gun.

Technical Data BAR 2765 BrE

Motor	205cc Vanguard 6.5 HP by Briggs & Stratton
Pump	AR Triplex. Direct Coupled. Brass Head
Pressure	2700 PSI 186 BAR
Water Flow	9 litres/minute 540 litres/hour
Diesel Tank	30 litres
Standard	15 Metre Hose, HD Wand & Gun, 13" Turf Tyres, QC Nozzles
Options	Downstream Detergent Injector, Hose Reel, Surface Tool
Weight	164 KG
Dimensions (mm)	L 1120 x W 712 x H 1150
